ES

Introducimos la primera colección Nexia Outdoor, creada para iluminar cualquier proyecto arquitectónico de exterior mediante una línea minimalista, limpia y orientada a su perfecta integración con todo tipo de espacios. Nuestro equipo de desarrollo y diseño ha creado la colección primando el diseño, la tecnología y la calidad, por lo que, en esta nueva gama de producto, Nexia sigue apostando por el rigor luminotécnico, la calidad de la luz y la variedad de opciones que nos permiten generar el ambiente adecuado para cada espacio.

La empresa está muy ilusionada de poder emprender este nuevo camino dentro del sector de la iluminación, aportando un catálogo completo para cubrir cualquier necesidad y seguir siendo líderes en calidad, servicio y diseño.

FR

Nous présentons la première collection Nexia Outdoor, conçue pour éclairer tout projet architectural d'extérieur avec une ligne minimaliste, propre et dirigée vers une parfaite intégration de toutes sortes d'espaces. Notre équipe de développement et de design a créé la collection en priorisant la conception, la technologie et la qualité, donc, dans cette nouvelle gamme de produits, Nexia continue son pari pour l'éclairage rigoureux, la qualité de la lumière et une variété d'options permettant créer le bon environnement pour chaque espace.

L'entreprise est très encouragée de prendre ce nouveau chemin dans le secteur de l'éclairage, en faisant parvenir un catalogue complet pour couvrir tous les besoins et continuer à être un des leaders dans la qualité, le service et le design.

IT

Presentiamo la prima collezione di Nexia dedicata all'Outdoor, creata per qualsiasi progetto architettonico per esterni. Con una linea minimalista e pulita, è perfetta per integrarsi con tutti i tipi d'ambiente. In questa gamma abbiamo privilegiato il disegno, la tecnologia e la qualità. Ancora una volta puntiamo sul rigore illuminotecnico, la qualità della luce e la varietà di possibilità per creare l'ambiente adeguato.

Siamo molto felici di poter iniziare questo nuovo progetto con un catalogo completo, capace di soddisfare tutte le necessità e di poter continuare ad essere leader in qualità, servizio e disegno.

We are introducing the first Nexia Outdoor collection, created for lighting up any outdoor architectural project by means of a minimalist, clean line aimed to be perfectly integrated with all kinds of spaces. Our development and design team has created the collection giving priority to design, technology and quality. For this reason, Nexia keeps betting on the lighting rigour, quality and the variety of options that allow us to generate the suitable atmosphere for each space.

The company is very excited to undertake this new journey within the lighting sector, providing a complete catalogue to cover any requirement and remaining a leader in quality, service and design.

Our first
collection

Ronda has been designed to create projection light being installed in garden areas with a pole or in wall lighting. With its 4 different beam angles and 5 powers we can cover any project.

Material:	Aluminium
Impact Protection:	IK06
Index Protection:	IP66
Driver:	Included
CRI:	80
Temperature:	2700K / 3000K / 4000K
Lifetime:	50.000h
Technology:	LED
Guarantee:	5 years
Class II	
Voltage:	110-240V (24101- / 24102-) 220-240V (24101- / 24103-)

Ronda

The search of comfort in LED technology

Throughout the day we are exposed to a large amount of stimuli. Many of them are imperceptible and get routinely processed, while others build up and take a toll on our well-being. In this landscape, Nexia's contribution is about creating innovative products that are true to their function and lend themselves to pleasant contemplation.

Light works in wondrous ways – it's an intangible phenomenon that affects the way we live. It produces large quantities of serotonin and melatonin, just as it connects us to space, enabling us to find orientation and to determine whether an environment is suitable for us or not. Light is hard to understand for most, but it is in fact governed by scientific rules which at present we can control, measure and quantify. At Nexia, we work to transfer to our customers our expertise in the many positive effects that a good light grants. We want to contribute more in the creation of versatile, inclusive and friendly environments.

In this context, we're introducing changes in the way we present ourselves, we remain the same and continue to work with the degree of professionalism that has always characterised us, but are constantly working to improve our communication. We maintain our knowledge and precision, working in closer proximity with our audience, and aspiring to build closer and more fruitful relationships with our customers.

This edition of our catalog presents luminaires for indoor, outdoor and architectural applications. We're introducing new signature designs that strive to make the most of light in innovative ways without compromising their quality, strength and rigour. Our present collection incorporates new products that are designed with the users at heart, and beyond the practical aspects, we have decided to take a step further into new horizons and develop objects with greater attention to detail. We share our experience and work with new collaborators so that the knowledge of light becomes a constant in the creation of new quality products. At Nexia we ultimately seek to convey a clear and direct message: the importance of light, and its impact on our daily lives. Nexia is not only light of exceptional quality and rigour, but also design, technology and quality of life.

A lo largo del día estamos expuestos a una gran cantidad de estímulos. Muchos de ellos son imperceptibles y se procesan de manera rutinaria, mientras que otros se acumulan y afectan a nuestro bienestar. En este contexto, la contribución de Nexia se basa en crear productos innovadores que sean fieles a su función y que al mismo tiempo generen un entorno agradable.

La luz funciona de manera maravillosa: es un fenómeno intangible que afecta la forma en que vivimos. Produce grandes cantidades de serotonina y melatonina, al mismo tiempo que nos conecta con el espacio, lo que nos permite encontrar orientación y determinar si un entorno es adecuado para nosotros o no. La luz es difícil de entender para la mayoría, pero de hecho se rige por una serie de reglas científicas, que actualmente podemos controlar, medir y cuantificar. En Nexia, queremos ofrecer a nuestros clientes nuestra experiencia en los muchos efectos positivos que concede una buena luz. Queremos contribuir más en la creación de entornos versátiles, inclusivos y amigables.

En este contexto, estamos introduciendo cambios en la forma en que nos presentamos, seguimos siendo los mismos y seguimos trabajando con el grado de profesionalismo que siempre nos ha caracterizado, pero estamos trabajando incesantemente para mejorar nuestra comunicación. Mantenemos nuestro conocimiento y precisión, trabajando más cerca de nuestra audiencia, y aspirando a construir relaciones más cercanas y fructíferas con nuestros clientes.

Esta edición de nuestro catálogo presenta luminarias para aplicaciones interiores, exteriores y arquitectónicas. Estamos presentando nuevos diseños exclusivos que se esfuerzan por aprovechar al máximo la luz de formas innovadoras sin comprometer su calidad, resistencia y rigor. Nuestra colección actual incorpora nuevos productos que han sido diseñados teniendo en cuenta nuestra experiencia de usuario, y más allá de los aspectos prácticos, hemos querido dar un paso más en nuevos horizontes y desarrollar objetos con mayor atención al detalle. Compartimos nuestra experiencia y trabajamos con nuevos colaboradores para que el conocimiento de la luz se convierta en una constante en la creación de nuevos productos de calidad. En Nexia, buscamos transmitir un mensaje claro y directo: la importancia de la luz y su impacto en nuestra vida diaria. Nexia no es solo luz de calidad y rigor excepcional, sino también diseño, tecnología y calidad de vida.

Tout au long de la journée, nous sommes exposés à un grand nombre de stimulations. Beaucoup d'entre eux sont imperceptibles et sont traités régulièrement, tandis que d'autres s'accumulent et s'impose dans notre bien-être. Dans ce contexte, la contribution de Nexia se base sur la création de produits innovants fidèles à leur fonction et en même temps créant un environnement agréable.

Une lumière fonctionne à merveille : c'est un phénomène intangible qui a beaucoup à voir dans notre façon de vivre. Un grand nombre de sérotonine et de mélatonine se produit, tout en nous connectant dans l'espace, nous permettant de trouver une direction et de déterminer si un environnement nous convient ou pas. La lumière est difficile à comprendre pour la plupart des gens, mais elle est en fait régie par une série de règles scientifiques que nous pouvons actuellement contrôler, mesurer et quantifier. Chez Nexia, nous voulons offrir à nos clients notre expérience dans les nombreux effets positifs qu'une bonne lumière nous fournit. Nous voulons contribuer davantage à la création d'environnements polyvalents, inclusifs et conviviaux.

Dans ce contexte, nous introduisons des changements dans notre façon de nous présenter, nous restons les mêmes et nous continuons à travailler avec le degré de professionnalisme qui nous a toujours caractérisé, mais nous travaillons sans relâche pour améliorer notre communication. Nous conservons nos connaissances et notre précision, en travaillant plus près de notre public et en établissant des relations plus étroites et plus fructueuses avec nos clients.

Cette édition de notre catalogue présente des luminaires pour des applications intérieures, extérieures et architecturales. Nous introduisons des nouveaux designs exclusifs qui s'efforcent de profiter au maximum la lumière de manière innovante sans engager la qualité, la résistance et la rigueur. Notre collection actuelle comprend des nouveaux produits qui ont été conçus tenant compte notre expérience comme utilisateur, et au-delà de la praticité, nous voulons aller plus loin dans des nouveaux horizons et développer des objets en faisant plus d'attention aux détails. Nous partageons notre expérience et travaillons avec des nouveaux collaborateurs afin que la connaissance de la lumière devienne une constante dans la création de nouveaux produits de qualité. Chez Nexia, nous cherchons transmettre un message clair et direct : l'importance de la lumière et son impact sur notre vie quotidienne. Nexia n'est pas seulement une lumière d'une qualité et d'une rigueur exceptionnelles, mais aussi un design, une technologie et une qualité de vie.

Durante tutto il giorno siamo esposti a una grande quantità di stimoli. Molti di essi sono impercettibili mentre altri influenzano il nostro benessere. Il contributo di Nexia si manifesta nel creare prodotti innovativi, fedeli alla loro funzionalità, ma capaci di creare un ambiente gradevole.

La luce funziona in modo meraviglioso: è un aspetto intangibile che influenza la nostra vita. Produce serotonina e melatonina oltre a collegarci con lo spazio, permettendoci di orientarci e decidere se un ambiente è adeguato o no. La luce è difficile da capire, si basa su una serie di regole scientifiche che oggi si possono controllare, misurare e quantificare. In Nexia vogliamo offrire ai nostri clienti la nostra esperienza e gli effetti positivi che offre la luce. Vogliamo collaborare alla creazione di spazi versatili e amichevoli.

Per questo stiamo introducendo cambi nel modo di presentarci, lavorando incessantemente nella comunicazione senza tralasciare la professionalità che da sempre ci ha contraddistinto. Manteniamo la nostra conoscenza e precisione lavorando vicino a voi e aspirando a relazioni di vicinanza.

Questo catalogo presenta lampade per interni, esterni e architeturali. Stiamo presentando nuovi disegni che approfittano al massimo la luce in forme innovatrici capaci di non compromettere la qualità, la resistenza e il rigore. Questa collezione include soluzioni che hanno considerato la nostra esperienza con i clienti oltre ad aspetti pratici ed è frutto di nuove collaborazioni capaci di creare lampade di qualità ed elevata personalizzazione. In Nexia cerchiamo di trasmettere un messaggio in modo forte e chiaro: L'importanza della luce e del suo impatto sulla nostra vita. Nexia non è solo luce di qualità e rigore, ma anche design, tecnologia e qualità di vita.
